Education

Bachelor of Systems and Computers Engineering.

2017 - 2022

- Al-Azhar University In Cairo [VIEW CERTIFICATE](#)

Experience

 **POSBANK ME** Flutter Engineer
Mar 2022 - Present

POSBANK is a global leading provider of Point of Sale solutions. I'm a part of the Flutter team responsible for building and maintaining multiple cross-platform mobile applications serving the retail industry used by hundreds of thousands of people.

Projects:

 **POPs Enterprise**
@POSBANK

Cloud-based POS & Restaurant management solution, apart from the Front-end and Mobile aspect of development, I also tapped into Server-side development and made a Dart web server using Shelf & Shelf-Router for communication between Client & Server devices.

press me

 **E-invoice QR reader**
@POSBANK

An app to display the QR code content of any E-invoice compliant with the Zakat & Tax Authority in KSA that has more than 250K active users. It tracks user transactions & expenses, visualize it through illustrative graphs, and generate detailed exportable reports.

 App Store  Play Store

Other Projects:

 **Carpooling App**
@Graduation Project

It is a car-sharing application that aims to reduce traffic congestion and costs for the user by sharing your Trip with others who have the same destination. Through this App, you can offer your trip and specify the start, end, cost and time. You can also find another trip to join.
